## SCHOOLS SCORED

## IN REPORT FROM

## SPECIAL INQUIRERS

WASHINGTON TIMES BUREAU, ALEXANDRIA, VA., MARCH 18.

The special grand jury which has been inspecting public buildings this morning made its report to Judge Bailey, in the corporation court.

Under your instructions we have examined the different schools and public buildings in the city of Alexandria and have found the following conditions, which we submit to your honor:

Washington Street School for Boys—In good condition; dust doors closed; broad halls; no danger to children from fire or panic.

Howell building for small boys—There are 150 little boys from seven to ten years of age housed in this building. Should the building catch fire but few would escape. This building is unsafe in every respect, an outside fire would reach the third floor, while it would improve conditions in the opinion of this jury that the building should be condemned entirely. We recommend that the building be closed immediately, especially so far as the use of the third floor is concerned.

Peabody building—This building we consider unsafe, and we recommend that the building be condemned for school purposes. We would be deterred from recommending that the building be closed immediately, as it is the only one of its kind in the city.

On this floor 150 little boys from seven to ten years of age are housed. We do not believe that building could be made safe for these little ones. In one room we found that they could not reach the fire-escape, with their heads being above or on line with the fire-escape. The building is heated by stoves in each class and bath platform. In the doors open inward and others outward.

To keep these little children on the third floor, single day, is a responsibility which this jury would refuse to assume.

The ground floor contains two rooms, opening on King street, which has only light and ventilation from transoms there being no windows. Transoms and doors cannot be left open over on warm days on account of dirt and air passing by passing electric cars and vehicles. To sum the matter up, King street is not the proper street for a public school building.

The sanitary arrangements of Peabody building is simply a disgrace.

Colored School Building—Both the colored school buildings we found to be in a satisfactory condition, except we would recommend that all doors be changed to open outward. Sanitary conditions could be much improved. We recommend that all school buildings be connected with sewers.

Braddock House—We recommend that fire-escape be placed on east side; also that the stairs be widened and fire-fax street, now closed, be opened.

Gelle Haven Amusement Company—Doors open inward, but have been changed since our inspection of the building. Operating box should be lined with tin. Scepta Hall—We recommend that a fire-escape be placed on front of this building.

Opera House—Stove pipe which runs through gallery should be changed; front stairway should be widened; no obstructions at top exit away; door should be cut in partition at southwest corner of gallery, making an entrance to stairway leading to stage.

McBurney's Hall—Stove propped up by bricks, liable to fall at any time; fire-escape blocked off by partitions. We recommend that this hall be condemned for public gatherings until changes are made.

We strongly recommend that all buildings used for public gatherings be required to have all doors open outward.

After the report had been read Judge Bailey instructed Clerk Greenaway to send a copy to the city council, the superintendent of schools, and the owners of public buildings which are mentioned as being unsafe. He also ordered that the attention of the city council be directed to Section 153 of the Code of Virginia, which has bearing on the case in question.
